¹ Not returned separately.

Cleveland has grown rapidly, though at widely varying rates, since 1830. From 1830 to 1870 the rates of increase in the population of the city ranged from 113.8 per cent for the decade 1860-1870 to 464.2 per cent for the decade 1830-1840. Since 1870 the rates of increase have ranged from 46.1 per cent for the decade 1890-1900 to 72.5 per cent for the decade 1870-1880. The absolute increase in population, however, has been larger with each succeeding decade since 1830.

The growth of Cincinnati during the last decade has been slow, the relative increase in population being the smallest shown for any decade covered by the table except that from 1890 to 1900, and the absolute

increase being smaller than for any decade since 1840 except that from 1890 to 1900.

Counties.—Ohio has 88 counties. The population of these counties ranges from 13,096 in Vinton County to 637,425 in Cuyahoga County.

There have been no changes in the territorial boundaries of the counties since 1900.

Forty-nine counties have increased in population during the last decade, the rates of increase ranging from one-tenth of 1 per cent in Fayette County to 65.6 per cent in Mahoning County, and the absolute increases from 19 in Fayette County to 198,305 in Cuyahoga County. Eighteen counties show a larger rate of increase than is shown for the state as a
